—
Thiago Moreira - Art and Tech

Hello,

nice to
meet you.

My enchantment with technology began in my early teenage years when I first got in touch with Digital Art. The period of computer stacks studies was financially supported by the most various low-wage jobs and design freelance.

With the experience in distinct work contexts, I had to develop skills to fit in each one of them, which provided me a culture of adaptation and constant learning.

I had just started my Fine Arts Bachelor studies when I found out about the possibility of mixing it with technology. Uniting both my passions I deepened my knowledge, becoming able to build art apps and websites. That's how I accomplished developing projects concerning digital arts, augmented reality, and electronic arts using Arduino, languages like C#, HTML, CCS, JS, and software such as Unity 3D.

Languages

Portuguese - Mother tongue (C2)

Spanish - Fluent (C1)

English - Professional (B2)

01/19 Visual Artist, Exhibition

06/19 Assembly and Graphic Designer

II International Colloquium Writing, Sound and Image - Federal University of Minas Gerais

I collaborated with the organization and assembly of the event and some of its graphic pieces, as well as exhibiting an Artist's Book accompanied by a Mobile Art APP they interacted with each other through technologies such as Augmented Reality, audio mining and geographic coordinates, using Unity3D.

11/21 Front-End Developer and

2022~ Designer UI/UX

Blue Projects - São Paulo-SP/ Brazil

Development for web and mobile using technologies such as ReactJs and Flutter. Support and thinking with clients the best Interface Design and User Experience according each project requirements.

12/20 JR Front-End Developer and

10/21 Designer UI/UX

Toki Network - Rio de Janeiro-RJ/ Brazil

I was introduced to the professional development environment, getting to know more about tools for creating web and mobile with Flutter, ReactJs and Angular.

01/20 Art Director and

11/20 JR Developer

4 Coisas - Rio de Janeiro-RJ/ Brazil

StartUp focused in supporting university students, I acted as the art director in exhibitions, also as graphic and video producer. By that time I was introduced to UI and had the opportunity to work with Angular framework.

01/16 Visual Artist, Exhibition

12/18 Assembly and Graphic Designer

Scientific Initiation at the Department of Photography and Digital Arts - UFMG

I organized and assembled art exhibitions at Espaço F, the Fine Arts University's gallery. By this period I also worked as a freelance designer and independent artist.

09/18 Video Editor and

10/18 Motion Graphics

Election Campaign for State and Federal Congressperson - Belo Horizonte-MG/ Brazil

Editing and animation of election video graphics focused in digital media.

Flutter / Dart

Mobile Development

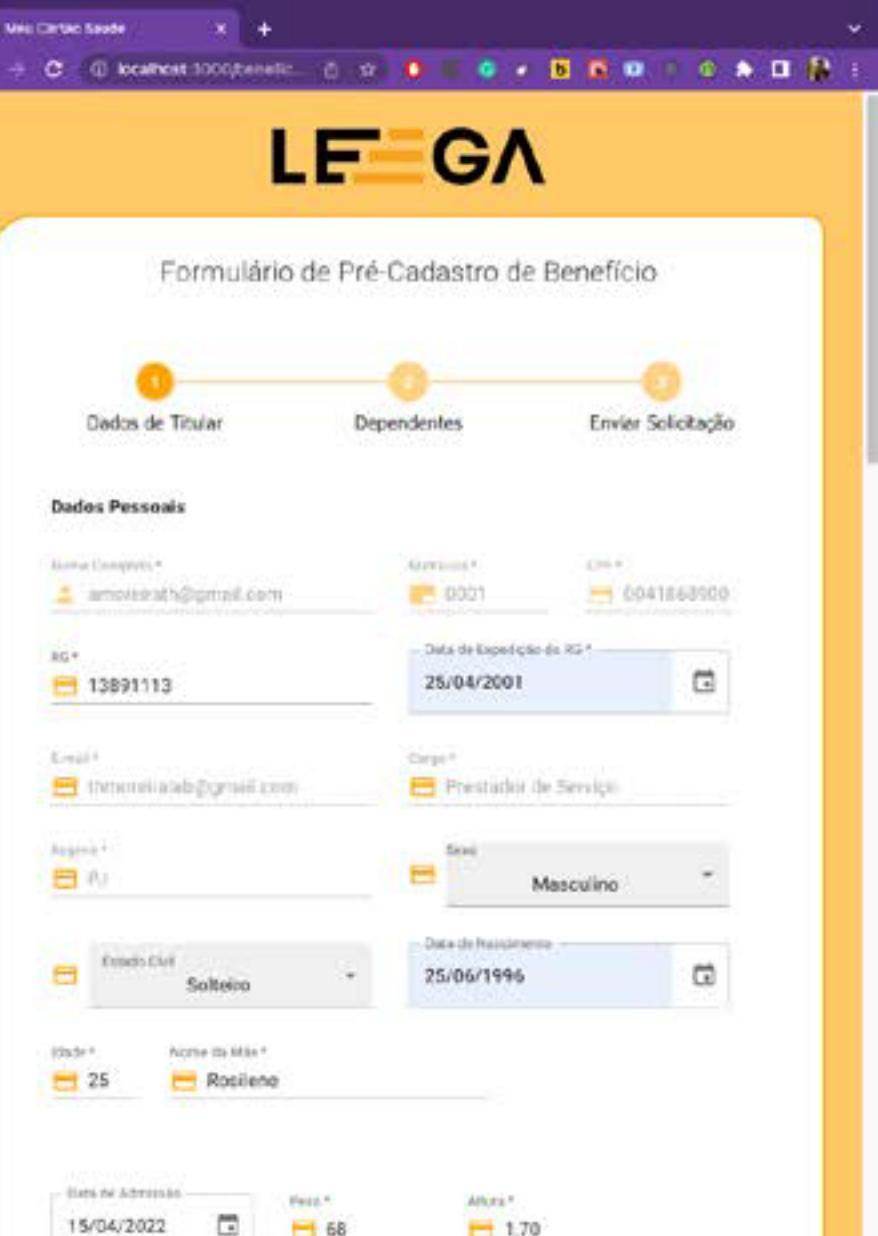

Parallel testing on different types of simulated devices and OS

Loyalty to the UI construction itself according to Customer's demands

React / JS - Redux

WEB Development

The screenshot shows a React application structure on the left and a browser view of a form on the right.

Left Side (Code View):

- File structure: `src`, `public`, `src`, `core`, `features`, `form`, `index.js`, `mail`.
- Code snippets from `FormActions.js` and `Form.js`:

```
const createAction = (type, payload) => {
  return { type, payload };
};

const updateTitular = createAction('UPDATE_TITULAR');
const updateDependente = createAction('UPDATE_DEPENDENTE');
```

Right Side (Browser View):

Form Title: Formulário de Pré-Cadastro de Benefício

Steps: Dados de Titular, Dependentes, Enviar Solicitação

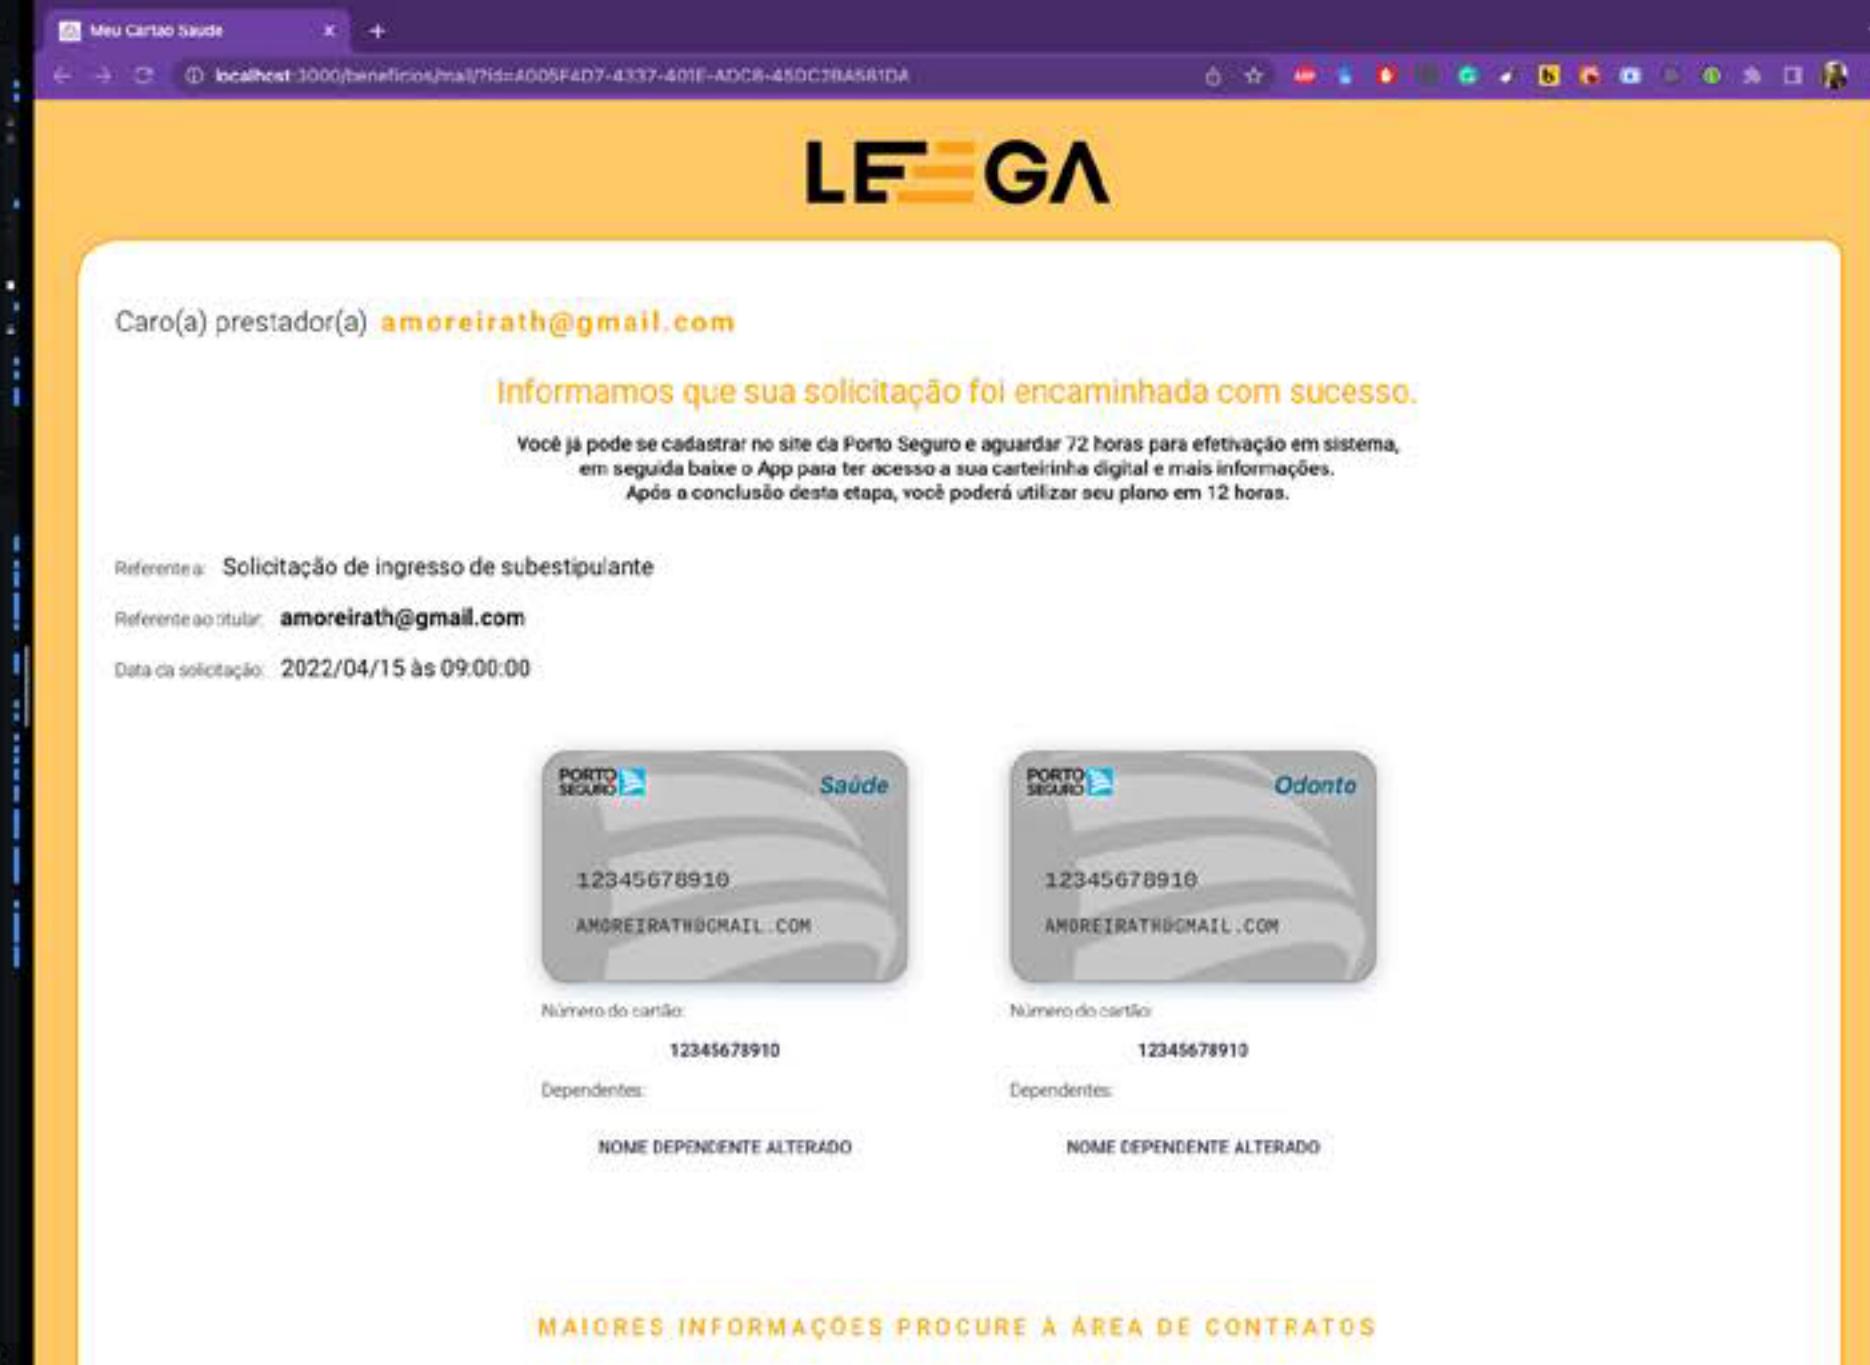

Dados Pessoais:

- RG: 13891113, Data de Expedição do RG: 25/04/2001
- Email: thmoriatiab@gmail.com, Carga: Prestador de Serviço
- Nome: Thássia Moriati, SobreNome: Bento, Cidade: Rio de Janeiro, UF: RJ, Logradouro: Rua das Flores, Bairro: Centro, Número: 123, Complemento: Apto 101, CEP: 22241-000
- Sexo: Masculino, Data de Nascimento: 25/06/1996
- Estado Civil: Solteiro, Nome da Mãe: Rosilene, Data de Nascimento da Mãe: 15/04/2002, Idade da Mãe: 68, Altura: 1,70

Following good architecture practices always makes me learn something new.

Delivering the costumer the satisfaction of a well thought product

Loyalty to the prototype designed with the customer, ensuring satisfaction

VOLTAR

As previously demonstrated in a redux example, here you can see the state management using Hooks

The screenshot displays a development environment with several code files and a browser preview.

Code Files:

- useErrors.js**: A hook that manages validation errors. It includes functions for validating CPF, address, and password, and a function to validate a composite value (CPF, address, password).
- DadosEntrada.js**: A context provider that uses the `useErrors` hook to manage validation errors for the entire application.
- App.js**: The main application component. It imports `FormularioCadastro` and `ValidacoesCadastro`. It uses the `DadosEntrada` context and a `ValidacoesCadastro.Provider` to wrap the form components.
- ValidacoesCadastro.js**: A context provider that manages validation rules for CPF and password.
- DadosUsuario.js**: A context provider that manages user data (email, senha).
- cadastro.js**: A component that handles the registration process. It uses the `useErrors` hook to validate the form and the `DadosEntrada` context to access validation rules.

Browser Preview:

The browser shows a registration form titled "Formulário de cadastro". The steps are: Login, Cadastro, Endereço, Finalização. The "Cadastro" step is active. It has fields for "email" (containing "aaaa") and "senha" (containing "aaa"). An error message for "senha" says: "Please include an '@' in the email address. 'aaaa' is missing an '@'." Another message below says: "Sua senha deve conter entre 4 e 11 dígitos". A "Cadastrar" button is at the bottom.

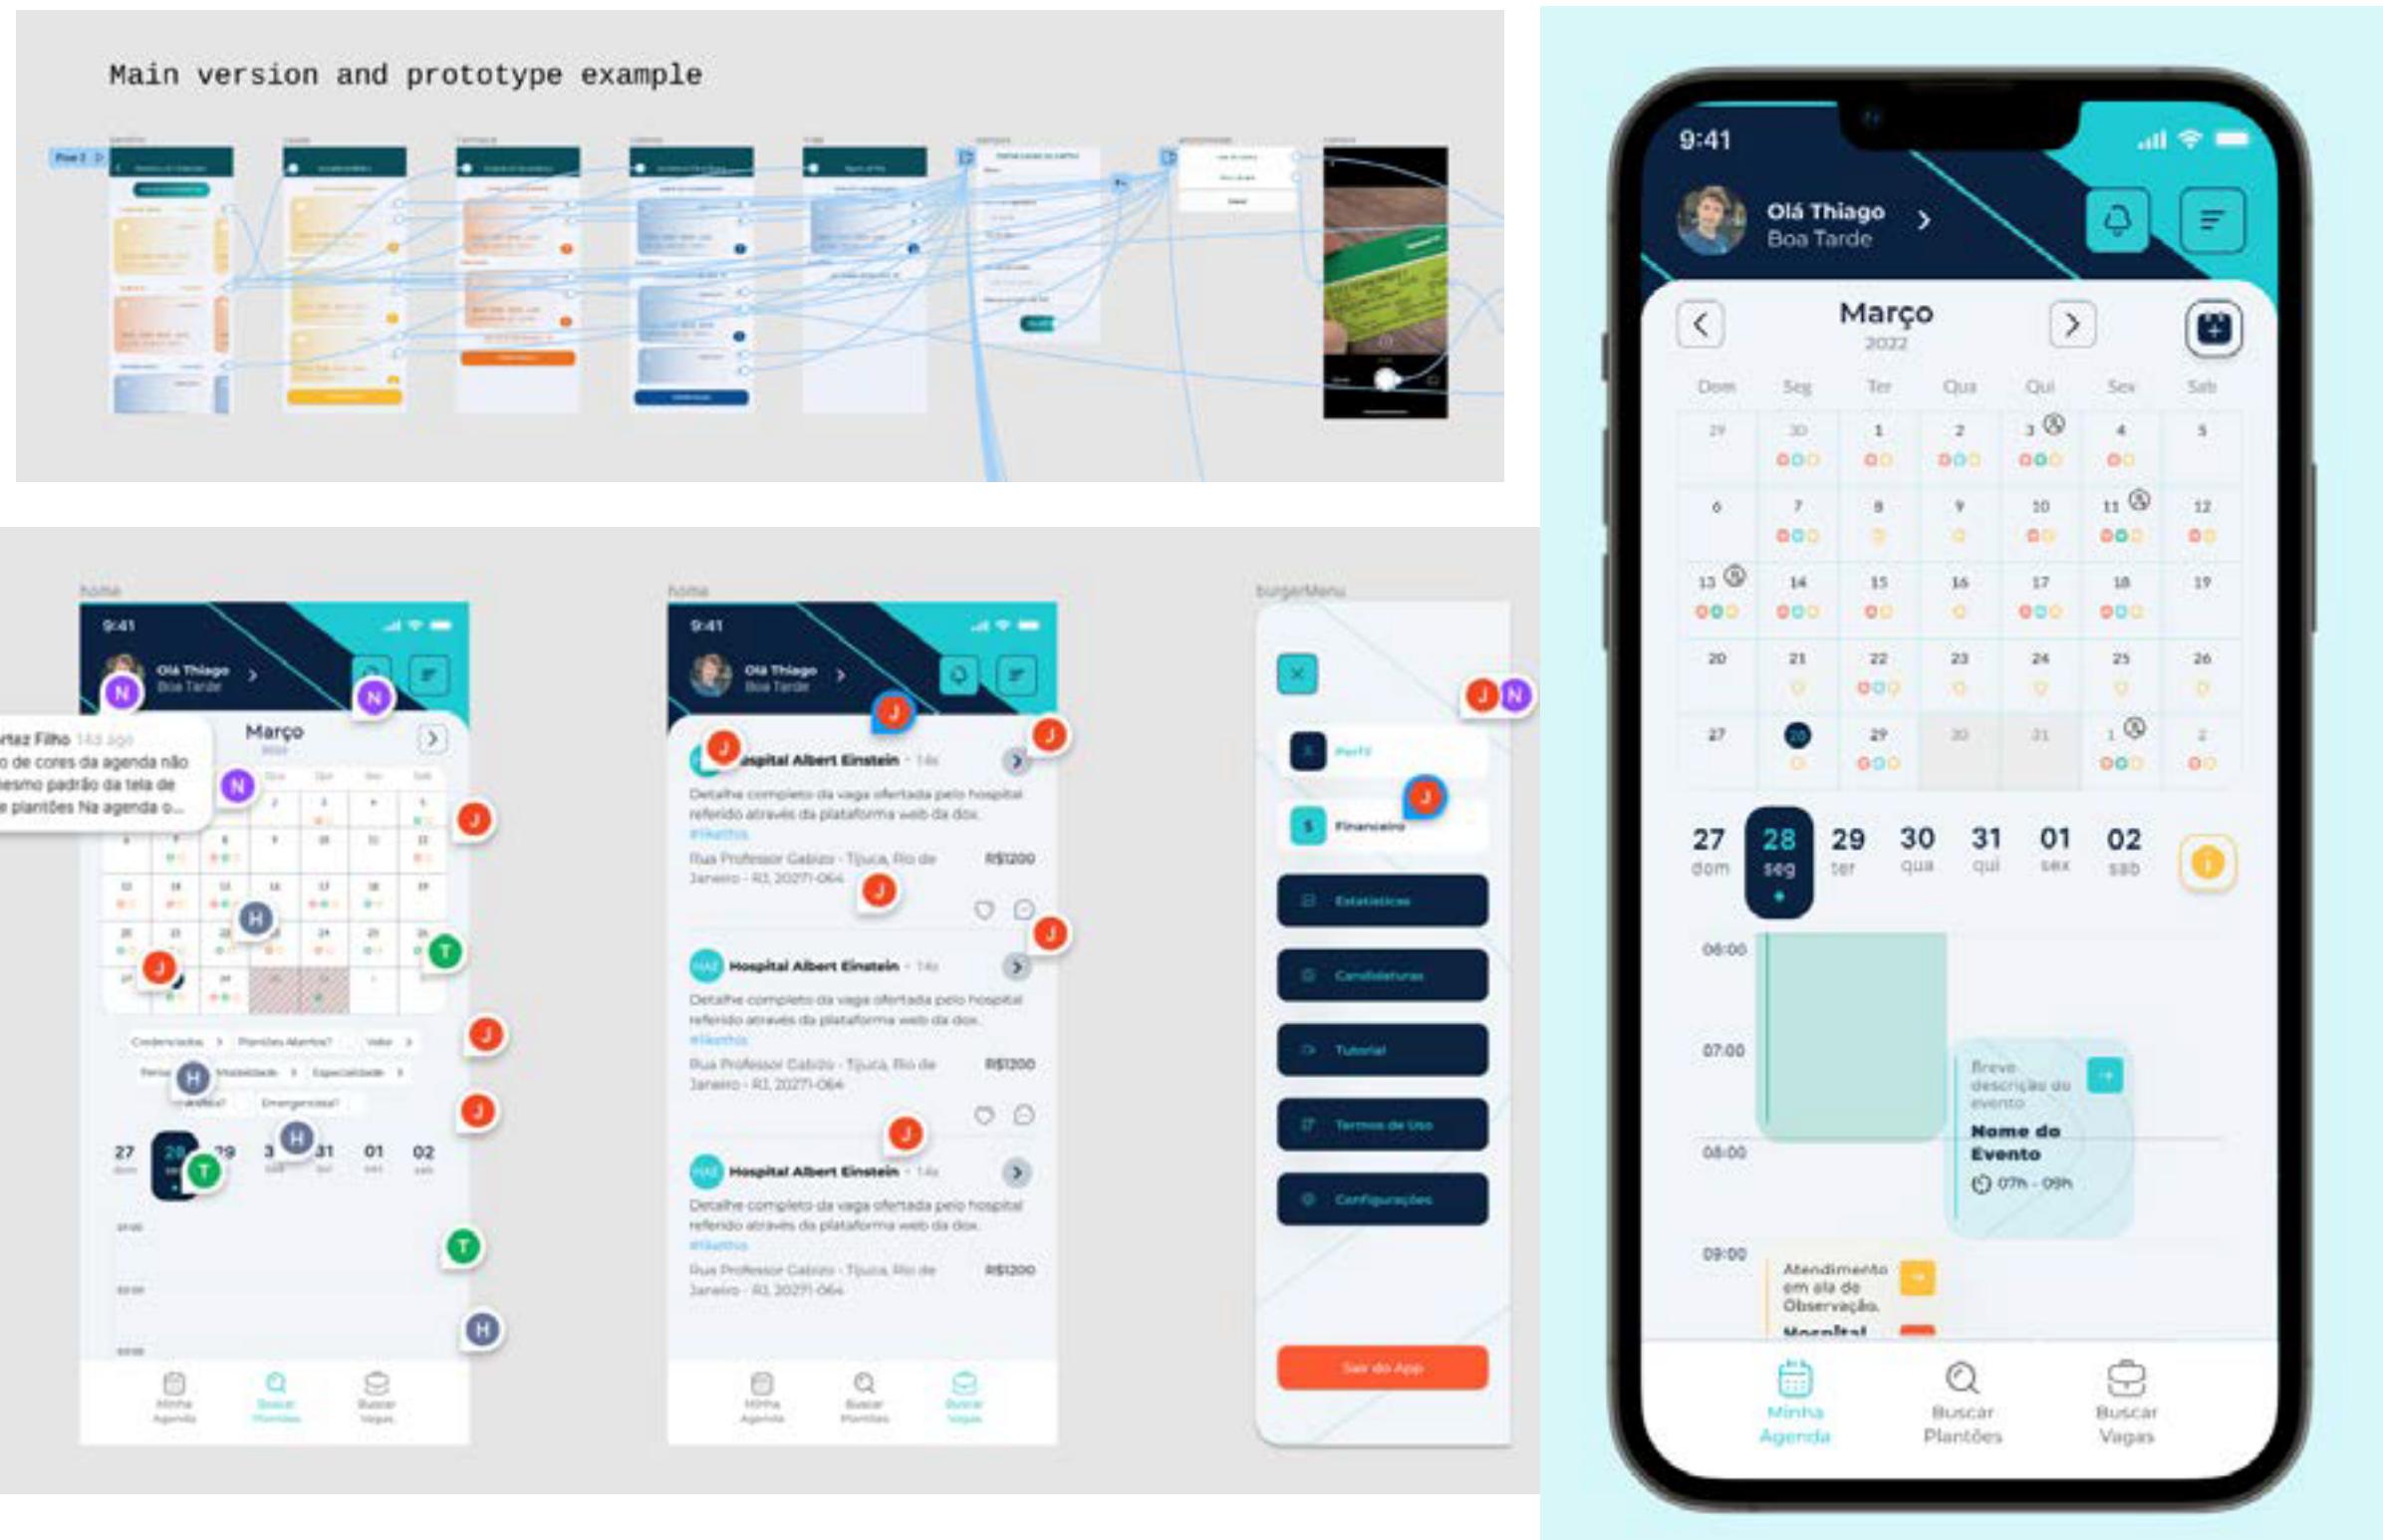

Confidence and ability to give continuity to projects already started by the team.
